INDEX TO VOLUME IX

East Engin. Chem. Engin
Library 10/27/23

GENERAL ALPHABETICAL INDEX

*Entries from the Synopsis of Periodical Literature are indicated by S. (Synopsis); from the Analysis of Current Electrochemical, Chemical and Metallurgical United States Patents by P. (Patents); from the Digest of Electrochemical United States Patents Prior to July, 1902, by D. (Digest). Illustrated articles are indicated by *.*

A

ABADY, Jacques 683
Abbe Engineering Co 332
Abbe, Paul O 676
Abrasives. Alumina, magnesia, etc. Allen. (P.) 666
Absorption of hydrochloric acid and other gases. Kingsbury *611
Acetylene explosion *476
Acids. Sulphuric, nitric, and mixed. Census report 680
Acid fan. Heinz-Skinner *674
Aero Pulverizer Co 617
AGITATOR:
——Air-lift. Hills. (P.) 423
——Allen. (S.) 425
——and filter in cyanidation. Hendryx *82
——Pulp. Paterson. (P.) 661
——Sicka. (P.) *109
Air-compressor for handling acids *161
Air desiccation by calcium chloride. Daubine and Ray *343
Air furnaces. Oil as fuel. Best *312
Air. Saltpeter. See Nitrogen. Atmospheric fixation.
Akin, A. D 478
Alaska 6
Aldrich, W. H 116
Alkali. Manufacture of ammonia alkali in England. Mason 81
Alkali-proof Portland cement *133
ALLOYS:
——Aluminium alloys..85, 107, 219, 511, 663
——Brass and bronze.....216, 228, 315, 321, 363, 403, 475, 516
——Calcium-copper. Franke (P.) 325
——Casting alloys 332
——Cerium. Hirach 543
——Conductivity and constitution 603
——Copper 151, 155, 515, 603
——Corrosion by salt water 152
——Corrosion of brass. Bruhl 516
——Duralumin 295
——Electric conductivity and constitution. Guertler 517
——Electrolytic refining. Betts. (P.)
——Gold and silver. Parting and refining. Kern *443
——Iron. Electric resistivity. Burgess and Aston 539
——Iron-manganese. Arnold 598
——Lining alloys 473
——Magnesium-zinc alloy. Rubel. (P.).. 156
——Melting point and alloying capacity. Goldschmidt 348
——Nickel-titanium. (R.) 663
——Non-ferrous alloys for high-pressure castings 63
——Pyrophoric 53, 424, 543, 663
——Reduction. Boericke. (P.) 424
——Review of possibilities. Whitney 316
——Scrap melting furnace. Barnes 315
——Sodium and potassium. Electric properties. Northrup 538
——Titanium. Huffard. (P.) 377
Alumina abrasives and refractories. Additions of magnesia, boric oxide, beryllia. Allen. (P.) 666
ALUMINIUM:
——Alloys. Analysis. Smith 85
——Alloys and impurities. (S.) 107
——Alloy. Claessen. (P.) 523
——Alloys manufacture. Mellen. (P.).. 219
——Alloys with zinc. Rosenheim and Archbutt 516
——Aluminum bronze. Durville. (P.).. 663
——Aluminium nitride production. Serpek. (P.) 523
——Electric reduction from sulphides. Keoch. (P.) 523
——Foundry economics. Barnes 315
——Manufacture at British Aluminium Co.'s works. Clacher 146
——Production in laboratory. Richardson 269
——Soldering. Dandelin. (P.) 325
Alundum refractories *225, *476
——Saunders *257
Amalgam barrels. Explosion. Dowling. (S.) 220
Amalgamation and cyanidation of silver ore in Mexico. Brodie. (S.)... 105
Amalgamation. Electrolytic. Atkins. (D.). 618
——Carey *266
Amalgamation of gold in banket ore. Dowling *322
Amalgamation practice on the Rand. Thomas. (S.) 519
Amalgamation. Wiswell. (D.) 618
American Chemical Society. Indianapolis meeting 338
American Chemical Society. Minnesota meeting 62
American Electrochemical Society, 8, 31, 122, 170, 231, 434, 477, 479, 626
——New York meeting. Report *255
——Toronto meeting. Report *524
American Foundrymen's Convention in Pittsburgh 250, 287, 311
American Grondal Co 332
American Institute of Chemical Engineers 122, 290, 482, 622
——Chicago meeting 386
——New York meeting 49
American Institute of Mining Engineers. San Francisco meeting *564
American Mining Congress.....164, 237, 483
American Museum of Safety 57
American Platinum Works 682
American Rolling Mill Co 114
American Smelting & Refining Co 436
American Vanadium Co 332, 477
American Vanadium Facts 195
Ammonia alkali. Manufacture in England. Mason 81
Anaconda smoke suit 123, 432
ANALYSIS:
——Aluminium alloys. Smith 85
——and sampling of gases. Methods of U. S. Steel Corporation....*302, 356
——Automatic gas analysis for boiler house and chemical works control. Simmance and Abady *327
——Arsenic and antimony in anode and cathode copper. Kern and Wen.. *365
——Brit. Nat. Phys. Laboratory 299
——Bureau of Standards analyzed samples 112
——Chromium in chrome-iron ore 515
——Chromium in Chrome-Tungsten Steel. 217
——Ferroboron. Davis 459
——Gauze electrode for rapid analysis. Benner *141
——Gold assays in the field. Austin. (S.) 520
——Gold and silver in copper. Kern and Heimrod 496
——Grading analyses 187
——Litmus solution 217
——Manganese in steel in presence of chromium and tungsten. Watters 244
——Manganese bronze. Huber 403
——Matte assay. Wilmoth. (S.) 280
——Methane in producer gas and water gas. Worrell *576
——Phosphoric acid. Martin 64
——Portable assay outfit. Bradford. (S.) 155
——Positive rays and chemical analysis. J. J. Thomson *298
——Rotating anode *477
——Separation of iron, aluminium, and chromium 217
——Silver-bearing ore assay. Keyes and Riddell. (S.) 467
——Small lime with much magnesia 217
——Sulphur in brass and bronze 217
——Sulphur in coal gas. Blair 321
——Sulphur in ore 677
——Tin ore. Morgan. (S.) 426
——Total carbon in iron, steel, and ferro-alloys. Queneau *441
——Tungsten ore. Watts 414
——Tungsten. Volumetric determination. 321
——Vanadium. Bleecker 209
——Wulfenite ores. Davis 458
Annealing copper. Johnson *87
Annealing. Malleable iron. Putnam *215
Anode. Rotating *477
Anode sludge of electrolytic refineries. Treatment. Kern *417
Ansonia Brass & Copper Co 475
Antimony. Distillation process. Fink. (P.) 667
Antimony and gold ore. Electrolytic treatment. Schreiber and Knutsen. (D.) 560
Antimony determination in anode and cathode copper. Kern and Wen. *365
Arbuckle process of ore treatment 141
Argall, Philip 618
Arizona 483
Arizona Copper Co 114, 115, 182, 442
Arsenic. Distillation process. Fink. (P.) 667
——antimony alloy. Electrolytic treatment. Betts. (P.) *378
——determination in anode and cathode copper. Kern and Wen *365
——in copper refining. Wen...318, 365, 536
——from ores. Peck. (P.) 523
Asbestos. Fibrous 417, 476, 683
Ashland Fire Brick Co 332

B

BABBITT 473
Baekeland, L. H 57
Bain, H. F 430
Bakelite 114
Balance. Voland 683
Balance sheet. Chemical. Beckman 194
Balbach, Edward 165
Balbach-Thum parting cell *445
Ball, H. S 683
Basic slag. Phosphates in 655
Bastian, L. D 559
Battery posts. Securing 475
Bayonne Casting Co 617
Benner, R. C 559
Bettles, Alfred J 478
Bicarbonating process 594
Blake, L. I 285
BLAST FURNACE:
——Bosh construction. Zippler. (P.)... 281
——Charging apparatus. McKennan. (P.) *108
——copper. Austin 41
——Copper blast furnace tops. Emmons. (S.) 220
——Gas. Sampling and analysis. Methods of U. S. Steel Corporation.. 356
——Hydrocarbon blast furnace for lead and copper. Nesmith. (P.)... *470
——Hydrogen in blast-furnace gas. Wysor and Brown 67
——Oxygen for blast *31, 174, 238
——Utilization of wastes. Hagar 407
Blast roasting. Sintering fine iron-bearing materials 431
Bleaching cotton. W. S. Williams 247
Bleaching oil with Fuller's earth. Weson. (S.) 51
Bleecker, W. F 285
Boiler firing with producer gas 673
Boiler, Fitzgibbon. Alexander. (S.) 52
Bone, A. J 116
BOOK REVIEWS:
——Bain. More recent cyanide practice. 58
——Barr. Testing for metallurgical processes 117
——Baskerville and Curtman. Qualitative chemical analysis 334
——Bayley. Elementary crystallography. 117
——Bowles. Tables for determination of common rocks 117
——Buchanan. Practical alloying 334
——Cameron. Soil solution 684
——Desch. Metallography 117
——Freundlich. Kapillar-chemie 230
——Greco. Elementi di metallurgia 117
——Hart. Welding 166
——Hendricks commercial register of the United States for buyers and sellers 618
——Hinds. Qualitative chemical analysis 334
——Kahlenberg. Outlines of chemistry. 118
——Louis. Metallurgy of tin 618
——Mennicke. Metallurgie des Wolframs 684
——Mennicke. Metallurgie des Zinnes.. 430
——The M. C. C. periodic chart of the elements 118
——Olsen. Van Nostrand's chemical annual 58

Book Reviews:
——Peters. Practice of copper smelting. 382
——Roberts-Austen and Harbord. An introduction to the study of metallurgy 117
——Rodenhauser and Schoenawa. Elektrische Öfen in der Eisenindustrie 230
——Scott. Qualitative chemical analysis. 334
——Stillman. Engineering chemistry.. 286
——Svedberg. Herstellung kolloider Lösungen anorganischer Stoffe.. 230
——Tiemann. Iron and steel..... 286
——West. The modern manufacture of Portland cement..... 118
Boron. Weintraub. (P.)..... 667
Boulin, Victor J..... *675
Braden Copper Co..... 604
Brass. Corrosion 216, 516
Brass-founders Association 315
Brass melting in electric furnace. Weeks 363
Brick. Sand-lime 496
Brinton, Walter 57
Bristol Co.....*56, 165, *677
British Association 514
British Columbia. Jacobs.....27, 405
Bromination process. Julian. (D.).... 430
Bromo-cyanogen 221
Bronze castings *228, 321
Bronze. Manganese. Analysis. Hurber 403
Bronze. Non-corrosive 475
Brown Instrument Co.....559, *614
Brown, N. H..... 478
Brunton, D. W..... 285
Bucherer, Prof. 285
Buffalo Forge Co..... 332
Buffalo Foundry and Machine Co..... *228
Bunnell, S. H..... 165
Bunsen. Reminiscences by Goldschmidt *569
Bureau of Mines.....114, 291, 388, 478, 559
——Chemical laboratories. Clement..... 90
Bureau of Standards. Analyzed samples 112
Bureau of Standards and control of thermal operations. Burgess..... 352
Burner. Meker. Fisher..... *223

C

CAETANI, Gelásio 560
Calcium carbide. Parks. (D.)..... 116
——de Chalmot. (D.)..... 116
——Gibbs and Witherspoon. (P.)..... *665
——in Norway 545
Calcium chloride for desiccation of air. Daubine and Roy..... *343
Calcium cyanamide. Beckman..... 12
——Larny and Lamb..... 100
——in Norway 545
——in gold metallurgy.....21, 53, 123
——plant. Acetylene explosion..... *476
California. Gold milling. Storms..... 493
California. Gold, silver, copper, lead... 483
——mercury 559
Callow, J. M.....165, 333
Calorimetry. Real vs. supposed errors. White 202
——Details of apparatus and method. White *296
——Temperature measurements and corrections. White..... 449
Camp Bird.....115, 218, 435
Canada. Electrochemical and electrometallurgical developments..... 539
Canal rays. Chemical effects. Kohlschütter. (S.)..... 469
Cananea Consolidated Copper Co..... 388
Canvas slime tables..... 187
Carbon dioxide. Manufacture. Bunnell *158
Carbon dioxide recorder. Simmance-Abady *327
——Uehling *329
——and temperature recorder. Uehling 656, *681
Carbon changed into graphite. Arsem... 536
Carbon electrodes.....168, 221
——Manufacture. Clacher..... *137
——Gaston. (P.)..... 111
——Mahlke *42
——Wolff. (P.)..... 111
——Holder. Heroult..... 377
——Factory in Niagara..... 559
——Protective coating..... 665
Carbon and graphite electrode..... *665
Carbonic acid. Term. Hering..... 625
Carbon monoxide and hydrogen. Reaction. Gautier..... 511
Carbon monoxide and steam. Reaction. Gantier 511
Carbonic oxide. Term. Hering..... 625
Carbon tetrachloride as fire extinguisher. 331
Carborundum refractories..... 613
Carbov rocker *558
Carnahan, R. B..... 683
Carpenter, Arthur H..... 683
Carpenter, C. W..... 683
Case hardening. See Iron and Steel.
Catalysis. Mental. Whitney..... 179
Caustic. Electrolytic. See Sodium chloride. Electrolysis.
Caustic pots repaired with thermit. Skinner *224
Cellarius tourill..... *611
Cement. Aeration of Portland cement. Bamber 50
Cement-burning with electric heat. Ellis. (P.) 668
Cement clinker. Grinding with ring roll mills and tube mills..... *610
Cement. Evolution of Portland cement process. McKenna. (S.)..... 51
Cement. Evolution of Portland cement processes. McKenna..... *182
Cement. Portland. From blast furnace slag. Hagar..... 407
Cement. Refractory..... 164
Cement rock. Drying..... *474
Cement. Standard and alkali-resisting Portland cement in Colorado... *133
Centrifugal separator of liquids and solids. De Laval..... *147
Centrifugals for laboratory work. Chavant *675
Centrifugal clarifier and filter..... *159
Centrifuge tester. De Laval..... *283
Cerium. Metallic. Preparation and properties. Hirsch..... 540
Chauvenet, Regis..... 116
Chemical control. Beckman..... 194
Chemical effects of canal rays. Kohlschütter. (S.)..... 469
Chemical engineers. Training. Whitaker 9
Chemical research and industrial progress. Walker..... 270
Chemistry and metallurgy. Claudet 50
Chemists Building.....119, 122
——Opening exercises..... *177
Chemists Club.....114, 682
Chilian mill and high-speed rolls. Comparative tests. Gahl..... *293
Chilian mills in Russia. Boyldon. (S.) 107
Chlorates by electrolysis. Briggs. (P.) 110
Chloridizing roasting of sulphide ores. Kothny. (S.)..... 518
Chlorination. Dry. Baker..... 8
Chlorination in Colorado..... 19
Chlorination process abandoned..... 338
Chlorination versus cyanidation..... 619
Chlorination process. Bottome. (D.).. 429
——Julian. (D.)..... 430
Chlorination. Electrolytic. Cassel (D.) 230, 333, 334
——Eames. (D.) 285
——Fitzgerald. (D.)..... 334
——Thompson. (D.)..... 230
——Thompson, Roberts, Pierce. (D.).. 285
Chlorination of low-grade copper ores. Schneider. (P.)..... 283
Chlorine. Electrolytic. See sodium chloride. Electrolysis.
Chrome iron..... 452
Cinnabar. Wet process. Mulholland. (S.) 468
Clancy, John C..... 165
Clarifier and filter. Centrifugal..... *159
Classification. Richards..... 48
Classification of tailing pulp prior to cyaniding. Johnson. (S.)..... 106
Classifier. Flood..... *242
Classifier. Overstrom..... 429
Classifier. Slime and sand. Dorr. (P.) 522
Clays. Grinding and screening. Worcester and Orton..... 245
Cleaning metallic articles. Genet. (P.) 111
Clubs. Research, at mills..... 335
Coal supply of world. Inventory. Richards 463, 559
Coal. Western steam..... 4
Cobalt 367, 587
Cobalt, copper, nickel ores. Pedersen.. 465
Coke ovens. First by-product in U. S. 478
Colloids. Lottermoser. (S.)..... 325
Colorado 6, 18, 339
Colorado School of Mines..... 58
Combustion. Surface. Bone.....622, *628
Compressed air for handling acids..... *161

Concentration:
——Cobalt practice. Mandy. (S.)..... 105
——Colorado 19
——in 1910. Guess 36
——Copper 236
——Development of economical ore dressing systems. Shepard..... 412
——Dings electromagnetic separator.... 429
——Elmore plant in Norway..... 381
——Flotation process in Idaho..... 567
——in Norway..... 381
——Mickle. (S.)..... 426
——Macquisten tubes..... 236
——Gilpin Co., Colo. practice..... *241
——Platiniferous copper ore at Rambler mine 75
——Practice in Gilpin County, Colorado *241
——San Juan County, Colo..... 594
——Screenless sizer. McKesson and Rice *553, *577, 625
——Silver-lead and zinc in B. C..... 27
——Table. Krom. (S.)..... 468
——Tungsten. Parmelee.....341, 409
——Water concentration. Guess..... 36
——Zinc ore in Colorado. Parmelee.. *91
——See also Classification.
Concrete mortar blocks..... 637
Congress of Technology in Boston..164, 235
Controller. Automatic for motor-driven machinery *679
Conservation in metallurgy..... 64
Consolidated Mercur Gold Mines Co.... 566
Conversion factors for cost of power. Hering 447

Converter:
——Copper. Austin..... 41
——Electric. Greene..... *275
——Steel, with surface blow. Deemer. (P.) 281
——Tuyere. Copper. Smith. (P.).... 661
Converting copper. Continuous..... 119
Conveyor belt installations..... 332

Copper:
——Addition agents in electrolytic copper deposition. Wen and Kern. 536
——alloys. Occluded gases in..... 155
——alloys with tin.....515, 603
——alloys with zinc..... 151
——analysis. Gauze electrode. Benner *141
——and zinc from complex ores. Hommel and Durant..... 152
——Annealing and diseases. Johnson.. *87
——Anode sludge treatment of electrolytic refineries. Kern..... *417
——Baggaley smelting process. (P.).. 110
——Blast furnace tops. Emmons..... 220
——Calcium and molybdenum for hard copper wire..... 319
——Cananea Consolidated Copper Co.... 388
——Chloridizing roasting of sulphide ores. Kothny. (S.)..... 518
——Concentration 236
——Concentrating table. Krom. (S.).. 468
——Concentration of platiniferous copper ore at Rambler mine..... 75
——Conductivity of mixtures of copper sulphate and sulphuric acid. Richardson and Taylor..... 536
——Continuous matte smelter. Moore and Kees. (P.)..... *283
——Converter tuyer. Smith. (P.).... 661
——Converting 48, 119
——Copper Extraction Co..... 617
——Copper—nickel—cobalt ores. Pedersen 465
——Copper-nickel separation in Norway. Richards 544
——Copper-nickel ores treatment. Carpenter. (P.)..... 662
——Copper-zinc sulphides in converter. Korda. (P.)..... 661
——Corrosion 216
——Determination of arsenic and antimony in [redacted] and cathode copper *365
——Determination of gold and silver in copper 496
——Dewaterer. Storage and tailings. Hendryx *82
——Direct smelting of argentiferous copper ore. Osa..... 630
——Electric furnace and copper poisoning. Hansen..... 67
——Electrodepositon of arsenic-free copper from electrolytes containing arsenic. Wen..... 318
——Electrolysis of iron-containing copper solutions. Lacroix. (S.)..... 107
——First National Copper Co..... 388
——Fume neutralization. Sprague. (P.) *423
——Hard-drawn 516, 516
——Hardening. Hamilton and Henry. (P.) 218
——Hydrocarbon blast furnace. Nesmith. (P.)..... *470
——Improving conductivity and tensile strength. Franke. (P.)..... 325
——in California..... 483
——in railway work. Hughes. 516, 602
——in 1910. L. S. Austin..... 40
——Leady copper matte. Hesse. (S.).. 518
——Lixiviation and electrolysis. Seegall. (D.) 430
——Lixiviation and electrolysis. Siemens-Halske. (D.).....429, 560
——Low-grade ores. Chlorination. Schneider. (P.)..... 283
——Magnitude of Western copper operations 60
——Melting in electric furnace. Weeks. 363
——Milling and smelting..... 65
——Neutralizing smelter fumes. Sprague. (P.) 218
——New copper mills..... 172
——Precipitation from solutions. Slaughter. (P.)..... 609
——1910 production..... 592
——Purification of electrolyte in refinery. Aldrich and Bryan. (P.)..... 326
——Schroeder. (S.) 154
——Pyritic smelting at Leadville, Doolittle and Jarvis. (S.)..... 106
——Reverberatory furnace. Murphy and Culley. (P.) *109
——Reverberatory furnace hearth construction. Schroeder and Longworth. (S.)..... 220
——Revolving reverberatory furnace. Brown 221
——Smelters in B. C..... 28
——Smelting and converting. Mitchell. (P.) 523
——Smelting in Michigan. Conant. (S.) 468
——Sulphating process with electrolysis. Haskell. (D.)..... 166
——Wrought copper metallurgy. Johnson *396

CORROSION:
——Acid test. Influence of copper in iron and steel. Walker..... 453
——Causes 320
——Electrolytic of electroplated objects. Landis..... 267
——Failure of brazed joint. Louis..... 517
——Influence of temperature..... 464
——in shipyard..... 320
——of brass and copper.....216, 516
——of copper and iron alloys by salt water 152
——of metals. Corner.....149, 150
——of pipes by local electrolysis. Speller 469
——of pipes by tramway stray currents. Lanpher and Smith. (S.)..... 469
——of steel in concrete..... 232
——Tobin bronze..... 475
——Treatment for prevention. Coslett. (P.) 660
Cost of power. Conversion factors. Hering 447
Cost of power in Norway..... 545
——in England..... 151
Cotton bleaching. Williams..... 247
Cottrell, F. G..... 478
Cripple Creek mill practice..... 192
Crushing. Some recent tests..... 480
——See also Grinding.
Crystalline growth and overstrain. Howe 79
Cupola melting practice. Munnoch..... 312
Cushman, Allerton S..... 57
Cutts, Vordon & Hoult..... *678
Cyanamide. See Calcium cyanamide.

CYANIDE PROCESS:
——Agitator. Sicka. (P.)..... 109
——Air-lift agitator. Allen. (P.)..... 425
——Hills. (P.)..... *423
——All-sliming treatment. Fyfe. (S.).. 380
——Antimonial gold ore. Brett. (S.).. 466
——Brakpan mill, Transvaal. (S.)..... 672
——Chlorination vs. cyanidation..... 619
——Clancy improved cyanide process. (P.) 521
——Clancy cyanamide process 21, 53, 123, 125, 266, 336
at Ajax mine 123
——Classification of tailing pulp prior to cyaniding. Johnson. (S.)..... 106
——Continuous cyanidation..... 336
——Continuous cyanidation. Dorr..... 436
——Continuous cyanide treatment for gold and silver ores. Rothwell *373
——Continuous cyaniding at Natividad, Mexico 605
——Continuous vacuum filter. Taylor. (P.) 660
——Counter-current of continuous agitation, decantation and dilution. Rothwell *439
——Cripple Creek mill practice..... 192
——Cyanidation and amalgamation of silver ores. Brodie. (S.)..... 105
——Cyanidation of ores. Hendryx..... *82
——Cyaniding concentrates..... 622
——Cyaniding tailings. Stevens and Degenhardt. (S.) 379
——Direct cyanidation of sulphides. Porter. (P.)..... 608
——Effect of heat on precipitation. Phillips. (S.)..... 219
——Electrolytic oxygen in solutions. Aldrich 649
——Filter press. Sweetland. (P.)..... 522
——Fine grinding. Denny. (S.)..... 279
——Halogen cyanide. Foersterling. (P.) 608
——Impact filter. Neikirk. (P.)..... *609
——in Colorado..... 18
——in Korea. Evans. (S.)..... 467
——in Utah and Nevada.....45, 46
——in 1910. Gordon..... 43
——Melting zinc-box precipitate. Aarons and Black. (S.)..... 670
——Old slime treated by air agitation. Adendorff. (S.)..... 519
——Pachuca agitator..... 232
——Phase rule in cyanidation. Lowden. 365
——Precipitation prior to filtration. Porter. (P.)..... 608
——Progress in 1910. Guess..... 37
——Pulp agitator. Paterson. (P.)..... 661
——Pyritic concentrates. Lindsay. (S.) 519
——Regeneration of cyanide solutions. Wheelock. (P.)..... 521
——Rotary filter. Arbuckle. (P.)..... 423
——Sand and slime classier. Dorr. (P.). *522
——Separating solution from ore pulp. Nichols. (P.)..... 522
——Silica sponge filters. Spilsburg. (P.) *422
——Silver ores at Cobalt..... 609
——Silver ores. Combination treatment. Sberrod. (S.)..... 280
——Slime filtration. Young..... 683
——Slime settlement. Gardiner. (S.) 467
——Suction filter. Kier. (P.)..... *109
——Tailings disposal in Mexico..... 588
——Tailings treatment..... 236
——Treatment of telluride ores. Crowe. (P.) 282
——Waihi mine. Banks. (S.)..... 425
——Whitall. (D.)..... 684
——Zinc dust precipitation. Clark. (P.) 380
Merrill. (P.) 661

D

DANIELS, J. B. 333
Dart, C. A. 618
Darton, N. H. 116
Davis, R. S. 560
Degalvanizing. Ramage. (P.)..... 219
De Laval Separator Co. *147, *159, *283
